

# MUHAMMAD SAAD AHMED

Lahore, Pakistan | saad18910@hotmail.com | linkedin.com/in/saad189 | github.com/saad189 | portfolio-saad.web.app

## EXPERIENCE

### Motive

Software Engineer, Frontend

Lahore, Pakistan

January 2026 – Present

- Built AI-driven document analysis features in the customer-facing web platform, now used 10,000+ times per day across fleets in the US and Canada, translating product discovery discussions into scoped, documented, and demoed deliverables.
- Authored, reviewed, and presented Technical Design Documents for frontend initiatives, aligning product and engineering on scope and approach before implementation and reducing late-stage rework.
- Instrumented frontend observability using Datadog (dashboards, alerts, error tracking) and Pendo (product usage analytics), and ran production incident response through Rootly.
- Adopted AI-assisted development workflows (Claude Code, Cursor), establishing prompting and review practices that shortened delivery time while holding code review and test coverage standards.
- Built an AI feature on Amazon Bedrock at an internal hackathon, integrating live model calls for real-time in-product responses and demoing the prototype to the engineering organization.

### Glotte

Lead Software Engineer / CTO

Doha, Qatar

May 2024 – January 2026

- Architected and delivered a cross-platform mobile product from scratch, owning architecture across mobile, backend, cloud, and data infrastructure (React Native, NestJS, TypeORM, MySQL, Redis, Elasticsearch).
- Designed API and data models for extensibility, supporting new content types without schema migrations; managed cloud infrastructure across AWS (Cognito, S3) and Railway for reliability at controlled cost.
- Led production launch on the Apple App Store and Google Play, implementing federated authentication and a RevenueCat subscription system (multi-tier plans, trials, unified entitlements) against platform compliance requirements.

### Dubizzle Labs

Software Engineer, Full Stack

Islamabad, Pakistan

May 2021 – June 2023

- Developed and improved Zameen's CRM, deployed across 4 companies and used by 4,000+ active users; reworked the lead generation module to reduce lead submission time by 50%.
- Led refactoring of legacy code into reusable, performant components, improving component performance by 100% while maintaining 90%+ code coverage through unit testing and structured QA.
- Redesigned reporting and staff modules around aggregated data visualization (TypeScript, SCSS, RxJS, ng2-charts, Lodash), reducing load times by 20%.

### Ciklum

Software Engineer, Full Stack

Islamabad, Pakistan

June 2019 – November 2020

- Developed and integrated location tracking and geographic compliance into an IoT management system deployed in the maritime industry for remote B2B vessel management.
- Integrated microservices running on Linux-based Docker containers deployed to Azure, using PostGIS and time-series databases for geospatial and telemetry data.

## EDUCATION

### Lahore University of Management Sciences (LUMS)

MS, Technology Management and Entrepreneurship

Lahore, Pakistan

July 2022 – June 2024

- Thesis: Best Practices in Domains of Project Management, Documentation and Compliance

### National University of Computer and Emerging Sciences (FAST-NUCES)

BS, Computer Science

Islamabad, Pakistan

August 2015 – June 2019

- Bronze Medal for Academic Excellence; Dean's List (Spring 2016, Spring 2017)

## SKILLS

**Engineering:** TypeScript, JavaScript, Angular, React, React Native, Node.js, NestJS, C#/.NET Core, Python, Jest, Git

**AI & LLM:** Amazon Bedrock, LLM API integration, prompt design and review practices, AI-assisted development (Claude Code, Cursor)

**Data & Cloud:** MySQL, PostgreSQL/PostGIS, MongoDB, Redis, Elasticsearch, time-series databases, AWS (Bedrock, Cognito, S3), Azure, Docker

**Practices & Tooling:** Technical Design Documents, code review, test coverage, Datadog, Rootly, Pendo, Agile (Scrum, Kanban), Jira, Azure Boards

## CERTIFICATIONS

AZ-900 Microsoft Certified: Azure Fundamentals | SQL and Database Design | C# Advanced Topics | Mastering LINQ in C# and .NET
